Wizards

Would you like to use wizards when adding new activities and resources?

- Use New Resource Wizard
- Use New Activity Wizard

Responsible Manager

When copying and pasting a project:

- Retain the responsible managers that were assigned to the copied data.
- Assign the OBS node of the new parent node to be the responsible manager for all pasted data.

Out of Sequence

- Warn about out of sequence activities

When adding or removing multiple resource assignments on activities

- Preserve the Units, Duration, and Units/Time for existing assignments
- Recalculate the Units, Duration, and Units/Time for existing assignments based on the activity Duration Type

Assignment Staffing

When assigning a resource to an existing activity assignment:

- Always use the new resource's Units per Time and Overtime factor
- Always use current assignment's Units per Time and Overtime factor
- Ask me to select each time I assign

When a resource and role share an activity assignment:

- Always use resource's Price per Unit
- Always use role's Price per Unit
- Ask me to select each time I assign

Startup Filters

Startup Filters

Choose the default filters to start the application. If you choose to view all data the application may take longer to start. These filters can be modified in the individual views.

	Current project data only	View all data (No Filter)
 Resources	<input checked="" type="radio"/>	<input type="radio"/>
 Roles	<input checked="" type="radio"/>	<input type="radio"/>
 OBS	<input checked="" type="radio"/>	<input type="radio"/>
 Activity Codes	<input checked="" type="radio"/>	<input type="radio"/>
 Cost Accounts	<input checked="" type="radio"/>	<input type="radio"/>

Use the settings below to determine whether the specified data should be loaded when you start P6 Professional. Select these options to improve performance when opening large projects, or clear them to improve performance when starting P6 Professional.

- Resource and role summaries
Note: This setting also controls whether resource and role data is used during project summarization.
- Large text data fields

Open Project Data

When multiple large projects are open, you might see improved performance in the Projects and Tracking views if you restrict them to showing only summary data. If you select this option, ensure your projects have been summarized recently and restart P6 Professional.

- Restrict Projects and Tracking views to summary data
